REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claim 5 has been written in independent form including the limitations from claims 1 and 2. Claim 5 is allowable over the prior art because claim 5 teaches a cleaning article, free of depressions, with a static frictional force between 9.8 and 29N, wherein any hairs that contact the cleaning article get entangled with each other into an aggregate and do not cling to the cleaning article. Additionally, the cleaning article further comprises a cushioning material that is attached to a support forming a planar structure, which is folded with the cleaning sheet facing outward. The prior art fails to teach folding a cleaning sheet, a cushioning material and a support.

Claim 6 has been written in independent form including the limitations from claims 1 and 2. Claim 6 is allowable over the prior art because claim 6 teaches a cleaning article, free of depressions, with a static frictional force between 9.8 and 29N, wherein any hairs that contact the cleaning article get entangled with each other into an aggregate and do not cling to the cleaning article. Additionally, the cleaning article further comprises a cushioning material with a projection, which fits into a depression on a holding member. The prior art fails to teach a cleaning sheet with the claimed static frictional force that is attached to a cushioning material that is inserted into a holding member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
